V1.0 July, 2023

IGPS-9084GP-LA-PN

Industrial Slim 12-port Secured managed Gigabit PoE Ethernet switch with 8x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-SFP, PROFINET Version

Features

- Support O-Ring (recovery time < 30ms) and MSTP(RSTP/STP compatible) for Ethernet Redundancy</p>
- Open-Ring support the other vendor's ring technology in open architecture
- O-Chain allow multiple redundant network rings
- Support standard IEC 62439-2 MRP*NOTE (Media Redundancy Protocol) function
- 8 port P.S.E. fully compliant with IEEE802.3at standard, provide up to 30 Watts per port
- Support PoE on/off scheduled configuration
- Support PoE alive check and auto reboot fuction
- Support IPV6 new internet protocol version
- Support EtherNet/IP™ and Modbus TCP protocol
- Support IEEE 802.3az Energy-Efficient Ethernet technology
- Provided HTTPS/SSH protocol to enhance network security
- Support SMTP client and NTP server protocol
- Support IP-based bandwidth management
- Support application-based QoS management
- Support Device Binding security function
- Support DOS/DDOS auto prevention
- Support auto-negotiation and auto-MDI/MDIX
- Support full and half duplex mode
- IGMP v2/v3 (IGMP snooping support) for filtering multicast traffic
- Support SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management
- Support ACL, TACACS+ and 802.1x User Authentication for security
- Support 9.6K Bytes Jumbo Frame
- Syslog/SNMP Trap notification for warning of unexpected event
- Support DBU-01 backup unit device to quickly backup/restore configuration
- Web-based ,SNMP v1/v2c/v3, Telnet, Console (CLI), and Windows utility (Open-Vision) configuration
- Support LLDP Protocol
- Rigid IP-30 housing with Fanless design
- > DIN-Rail and wall mounting enabled
- Profinet CC-B v2.40 certified and GSD file provided
- Support PROFINET MRP client (MRC)

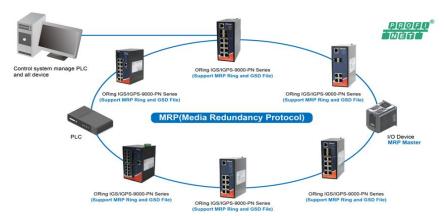

Introduction

IGPS-9084GP-LA-PN is layer2 managed PoE Ethernet switch with 8x10/100/1000Base-T(X) P.S.E. ports and 4x100/1000Base-X SFP ports, which is designed for various industrial applications, including manufacturing, process automation, transportation, and energy industries. The PROFINET certification of this product line ensures its compliance with rigorous industry standards and seamless communication compatibility with PROFINET systems.

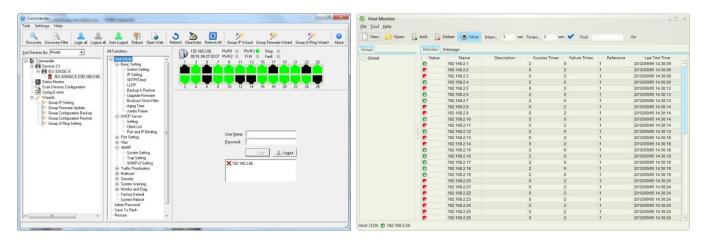

The switch support Ethernet Redundancy protocol, **O-Ring** (recovery time < 20ms over 250 units of connection) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology. IGPS-9084GP-LA-PN also support Power over Ethernet, a system to transmit electrical power up to **30 watts**, total PoE power budget is 240W max, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. IGPS-9084GP-LA switch has 8x10/100/1000Base-T(X) P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device (switch or hub for instance) that will provide power in a PoE connection. And support wide operating temperature from -40 °C to 75 °C. IGPS-9084GP-LA can also be managed centralized and convenient by Open-Vision, Except the Web-based interface, Telnet and console (CLI) configuration.

- O-Ring: O-Ring is ORing's proprietary redundant ring technology, with recovery time of less 20 milliseconds and up to 250 nodes. The O-Ring redundant ring technology can protect mission-critical application from network interruptions or temporary malfunction with its fast recover technology.
- <u>Open-Ring</u>: Open-Ring is an enhanced redundant technology that makes ORing's switches compatible with other vendor's proprietary redundant ring technologies. It enables ORing's switches to form a single ring with other vendor's switch. In cases where the ring is setup using proprietary technology, ORing offers a compatibility service where ORing can make its switches compatible with your particular network requirements.
- O-Chain: O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology. O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology.
- MRP*NOTE: Media Redundancy Protocol (MRP) is a data network protocol standardized by the IEC 62439-2. It allows
 rings of Ethernet switches to overcome any single failure with recovery time much faster than achievable with
 Spanning Tree Protocol.
- **IP-based Bandwidth Management :** The switch provide advanced IP-based bandwidth management which can limit the maximum bandwidth for each IP device. User can configure IP camera and NVR with more bandwidth and limit other device bandwidth.
- <u>Application-Based QoS</u>: The switch also support application-based QoS. Application-based QoS can set highest priority for data stream according to TCP/UDP port number.
- <u>Device Binding Function</u>: ORing special Device Binding function can only permit allowed IP address with MAC address
 to access the network. Hacker cannot access the IP surveillance network without permission. It can avoid hacker
 from stealing video privacy data and attacking IP camera, NVR and controllers.
- Advanced DOS/DDOS Auto Prevention: The switch also provided advanced DOS/DDOS auto prevention. If there is any IP flow become big in short time, the switch will lock the source IP address for certain time to prevent the attack. It's hardware based prevention so it can prevent DOS/DDOS attack immediately and completely.
- EtherNet/IPTM: This product is ODVA CONFORMANT for use in EtherNet/IP industrial automation systems
- Modbus TCP: This is a Modbus variant used for communications over TCP/IP networks.
- <u>IEEE 802.3az Energy-Efficient Ethernet</u>: This is a set of enhancements to the twisted-pair and
 backplane Ethernet family of networking standards that will allow for less power consumption during periods of low
 data activity. The intention was to reduce power consumption by 50% or more.

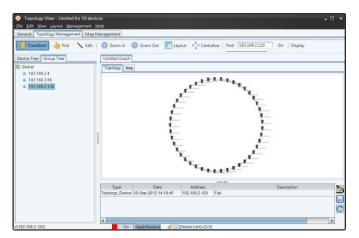

Open-Vision

ORing's switches are intelligent switches. Different from other traditional redundant switches, ORing provides a set of Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.

IEEE 802.1AB for LLDP (Link Layer Discovery Protocol)
PoE Power Supply Type Endspan mode
Per port 56V DC, 350mA. Max. 15.4 watts (IEEE 802.3af),
PoE Power Output Per Port 56V DC, 590mA. Max. 30 watts (IEEE 802.3at)
MAC Table 8k
Priority Queues 8
Processing Store-and-Forward
Share Data Buffer 4Mbit
Switching latency: 7 us
Switching bandwidth: 24Gbps
Throughput (packet per second): 17.856Mpps@64Bytes packet
Switch Properties Max. Number of Available VLANs: 4096
VLAN ID Range: VID 0 to 4095
IGMP multicast groups: 256 for each VLAN Port rate limiting: User Define
Jumbo frame Up to 9.6K Bytes
Device Binding security feature
Enable/disable ports, MAC based port security
Port based network access control (802.1x)
VLAN (802.10) to segregate and secure network traffic
Security Features Radius centralized password management
SNMPv3 encrypted authentication and access security
Https / SSH enhance network security
IEC 62443 Certified
STP/RSTP/MSTP (IEEE 802.1D/w/s)
Redundant Ring (O-Ring) with recovery time less than 20ms over 250 units
TOS/Diffserv supported Quality of Service (802.1p) for real-time traffic
VLAN (802.1Q) with VLAN tagging
IGMP Snooping
IP-based bandwidth management
Software Features Application-based QoS management
DOS/DDOS auto prevention
Port configuration, status, statistics, monitoring, security
DHCP Server/Client/Relay
SMTP Client
Modbus TCP
EtherNet/IP™
NTP server
O-Ring Open-Ring
Network Redundancy Open-Ring O-Chain
MRP*NOTE
PIN

	MSTP (RSTP/STP compatible)
PROFINET conformance class	Conformance-class B
RS-232 Serial Console Port	RS-232 in RJ45 connector with console cable. 115200bps, 8, N, 1
LED indicators	
Power Indicator (PWR)	Green: Power LED x 3
Ring Master Indicator (R.M.)	Green : Indicates that the system is operating in O-Ring Master mode
O-Ring Indicator (Ring)	Green: Indicates that the system operating in O-Ring mode Green Blinking: Indicates that the Ring is broken.
Fault Indicator (Fault)	Amber : Indicate unexpected event occurred
10/100/1000Base-T(X) RJ45 Port Indicator	Green for Port LINK/ACT indicator Dual color LED for speed indicator: Green for 1000Mbps / Amber for 100Mbps / off-light for 10Mbps
100/1000Base-X SFP Port Indicator	Green for port Link/Act.
PoE Indicator	Green : PoE enabled LED x 8
Reset Function	
Reset Button	< 5 sec: System reboot, > 5 sec: Factory default
Power	
Redundant Input power	50/57VDC on 6-pin terminal block
Power consumption (Typ.)	13.2 Watts
PoE Power Budget	240W max, 30W/per port
Overload current protection	Present
Reverse Polarity Protection	Present
Physical Characteristic	
Enclosure	IP-30
Dimension (W x D x H)	54.3 (W) x 108.3 (D) x 145.1 (H) mm (2.13 x 4.26 x 5.71 inches)
Weight	779g
Environmental	
Storage Temperature	-40 to 85°C (-40 to 185°F)
Operating Temperature	-40 to 75°C (-40 to 167°F)
Operating Humidity	5% to 95% Non-condensing
Regulatory approvals	
EMC	CE EMC (EN 55025, EN 55032), FCC Part 15 B
EMI	EN 55032, CISPR32, EN 61000-3-2, EN 61000-3-3, FCC Part 15 B class A
EMS	IEC/EN 61000-4-2 (ESD) IEC/EN 61000-4-3 (RS) IEC/EN 61000-4-4 (EFT) IEC/EN 61000-4-5 (Surge) IEC/EN 61000-4-6 (CS), IEC/EN 61000-4-8(PFMF),
Shock	IEC60068-2-27
Free Fall	IEC60068-2-31
Vibration	IEC60068-2-6
Safety	UL61010-1
MTBF	516416hrs
Warranty	5 years

Ordering Information

Packing List

- IGPS-9084GP-LA-PN x 1
- ORing Tool CD x 1
- Quick Installation Guide x 1

- DIN-Rail Kit x 1
- Wall-mount Kit x 2
- Console Cable x 1

Optional Accessories

Open-Vision M500 : Powerful Network

Management Windows Utility Suit, 500 IP devices

DBU-01 : backup unit device

SFP100 series: 100Mbps SFP optical transceiver

SFP 1G series : 1Gbps SFP optical transceiver
