# **High-sensitivity Type Human Presence Detection**

► Each module of the PIR-234/PIR-234L series contains 4 PIR sensors. Each PIR sensor can be independently configured to turn on/off, providing flexibility in adjusting the detection range and adapting to different layouts of the space.

PIR-234 Series

PIR-234L Series

Are you facing these issues when using infrared sensors for human presence detection?

► Lights go out abruptly when you are being focused in a meeting?

Or, lights go out suddenly while you are refilling water in an office pantry?

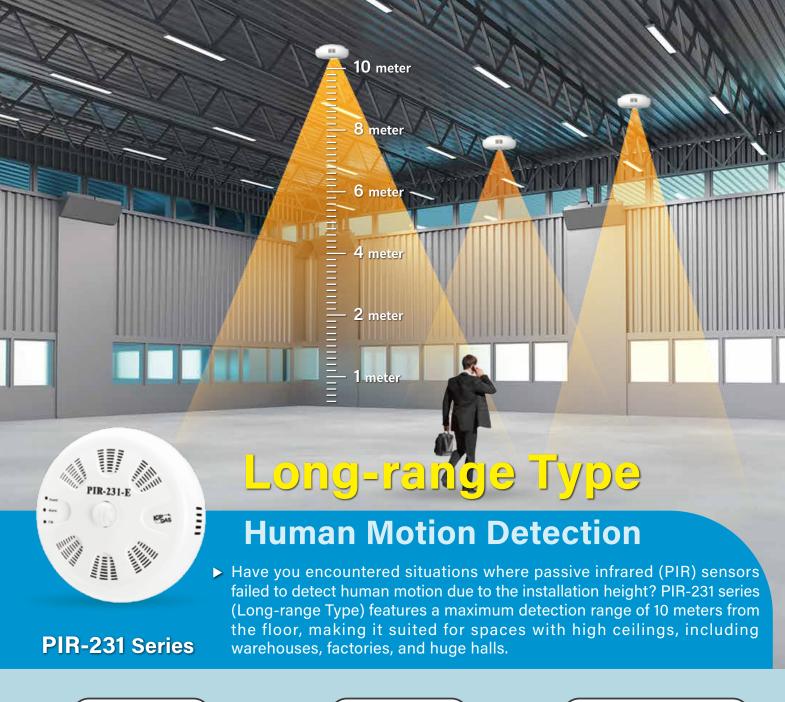

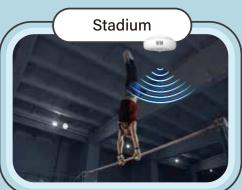

PIR-234/PIR-234L series, the high-sensitivity type, feature 4 built-in PIR sensors in each module. The design greatly enhances the sensitivity of human presence detection, capable of detecting movement with a diameter as small as 3 cm. This series is ideal for applications in which human body movement is subtle, preventing unnecessary light deactivation caused by undetected human presence. With a reliable lighting control system, you can concentrate on meetings, work, reading, and other indoor activities.

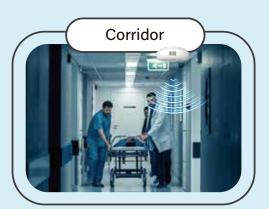

# **Standard Type Human Motion Detection**

PIR-130 Series

PIR-230 Series

▶ PIR-130/PIR-230 series, the standard type, is designed to detect human motion and then activate lights accordingly. Individuals no longer have to fumble around in the dark for a light switch. Besides, the automatic lighting control system achieves energy savings. This series is suitable for various passage applications, including corridors, staircases, and entryways with shoe storage cabinets & benches.

## **Building Automation & Integrated IoT Applications**

A combination of PIR and WISE enables lighting that creates different ambiances

PIR-130/230 Human Motion Sensor Module

M-7000 I/O Module

WISE Series
Intelligent Edge
Controller

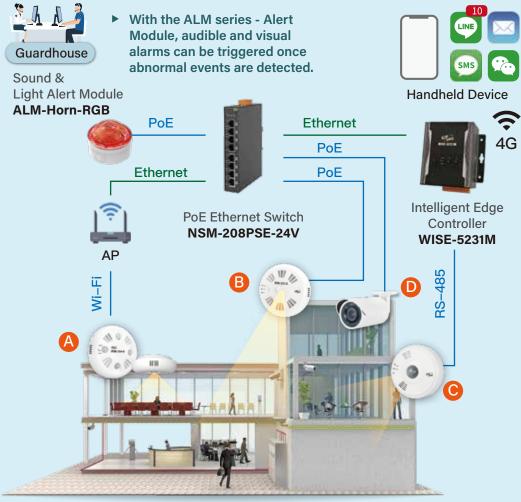

Install PIR sensors at both ends of a corridor and connect them to the WISE controller. This system enables lighting control through IF-THEN-ELSE logic rules. For example, it can be configured to activate each light sequentially from the nearest to the farthest once a human walking motion is detected.

## **Building Automation & Integrated IoT Applications**

- Various Communication Protocols
- ► PIR Integrates with Building Monitoring Applications Easily
- Greatly Ease the Burden on Staff Conducting Inspections

An integration of the PIR series and WISE controllers enables detection of intrusions during off-hours. Besides, real-time alert messages can be sent via LINE or email to the right personnel. With an additional iCAM series - IP Camera, management staff can access live videos/photos of events for further verification.

### A PIR-234-WF (High-sensitivity Type)

In meeting rooms, where the movement of individuals are subtle, PIR-234 Motion Sensor Module is recommended for lighting control.

# B PIR-231-E (Long-range Type)

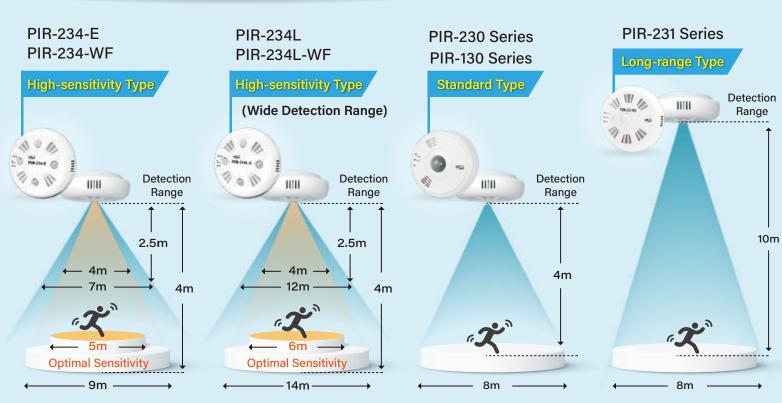

In spaces with high ceilings, PIR-231 Motion Sensor featuring a long detection range (height) is recommended for applications.

# PIR-130 (Standard Type)

In office buildings, where people pass by often and show noticeable movements, PIR-130 Motion Sensor Module is recommended to detect human walking motion for lighting control.

#### D iCAM Series

Once PIR sensors detect an unauthorized intrusion, the iCAM series - IP Camera captures videos and photos which are then displayed in the guardhouse. Alternatively, with the WISE controller, snapshots can be sent via LINE to the right personnel.

# **Selection Guide**

**High-sensitivity Type** 

Model	Communication Interface	Sensor	DI/DO	Power Supply	Detection Range (Height)	Detection Range (Diameter)
PIR-234-E	RS-485+Ethernet(PoE)	Temperature + Humidity	2 Relay	DC	4m	9m
PIR-234-WF	RS-485+Ethernet(PoE)+Wi-Fi					
PIR-234L-E	RS-485+Ethernet(PoE)					14m
PIR-234L-WF	RS-485+Ethernet(PoE)+Wi-Fi					

Long-range Type

Model	Communication Interface	Sensor	DI/DO	Power Supply	Detection Range (Height)	Detection Range (Diameter)
PIR-231-E	RS-485+Ethernet(PoE)	PIR+T&H	2 DI + 1 Relay	DC	10m	8m
PIR-231-WF	RS-485+Ethernet(PoE)+Wi-Fi					

**Standard Type** 

Model	Communication Interface	Sensor	DI/DO	Power Supply	Detection Range (Height)	Detection Range (Diameter)
PIR-230-E	RS-485+Ethernet(PoE)	PIR+T&H	2 DI + 1 Relay	DC	4m	8m
PIR-230-WF	RS-485+Ethernet(PoE)+Wi-Fi					
PIR-130-AC	RS-485	PIR+T	1 Relay	AC	4m	8m
PIR-130-DC	RS-485			DC		

- PIR-230, PIR-231, and PIR-234 Motion Sensor Module can be supplied with power via Ethernet PoE-capable without additional cabling.
- **Support Various Communication Protocols** and Interfaces

PIR series supports many communication interfaces (RS-485, Ethernet, Wi-Fi) and protocols (DCON, Modbus RTU, Modbus TCP, and MQTT). This allows seamless integration with HMI or SCADA systems and facilitates easy maintenance in distributed systems.

### **Built-in Temperature and Humidity Sensors**

PIR-234, PIR-231, and PIR-230 Motion Sensor Module have built-in temperature and humidity sensors, while the PIR-130 Motion Sensor Module only has the built-in temperature sensor. These sensors enable the PIR modules to offer temperature & humidity monitoring in addition to human motion detection.
